Fall is going on at full speed and it is hard to believe that it is already November. We are very close to the end of this year and you can already feel the Christmas spirit in our school.

Everybody is talking about Christmas presents and their plans for Christmas so this month is more like a preparation for Christmas time. We have a joke about it:

How long is Christmas in the Czech Republic?

Three months!

As for this issue, we focused on one of the most popular online games: Roblox. Our authors have tried to find the answer to the question: Is this really safe? We took a peek at the famous opal, a precious and beautiful stone from Australia and the interesting story of the city Coober Pedy. The page for rubik's cubes gives us information and milestones of this hobby. We even have a page about the very famous influencer Andrew Tate and his extra rich life. Take our questionnaire to find out more about your personality and read the book review to find something to read. Are you interested in star signs or curious about personal patterns of certain people? Then you need to see our zodiac page. Enjoy reading and we hope to see you in the next issue.

Coober Pedy

Lea Benedová

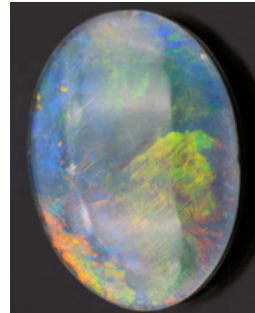

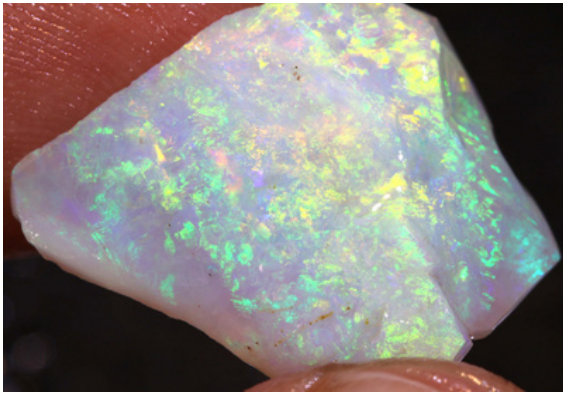

In northern South Australia lies a town named Coober Pedy. The town is referred to as "the opal capital of the world" because of the quantity of precious opals that are mined there. Coober Pedy is renowned for its below-ground dwellings, called "dugouts", which are built in this fashion because of the scorching daytime heat.

The name "Coober Pedy" is thought to be derived from the Aboriginal term kupa-piti, which means "whitefellas' hole", but in 1975 the local Aboriginal people of the town adopted the name Umoona, which means "long life" and is also their name for the mulga tree.

Aboriginal people have a long-standing connection with the area. Coober Pedy is considered by the senior Western Desert people to be the traditional lands of the Arabana people country, but Kokatha and Yankunytjatjara people are also closely attached to some ceremonial sites in the area.

The first European explorer to pass near the site of Coober Pedy was Scottish-born John McDouall Stuart in 1858. The town was not established until after 1915, when the first opal was discovered by Wille Hutchison on 1. February of that year . Opal miners started moving in around 1916. The name Coober Pedy was decided upon at a Meeting in 1920, when a post office was established. The town has become a popular stopover point and tourism destination, especially since 1987, when the sealing of the Stuart Highway was completed.

Coober Pedy today lies as much on tourism as the opal mining industry to provide the community with employment and sustainability. Visitors attractions in Coober Pedy include the mines, the graveyard and the underground churches. There are several Motels offering underground accommodation, ranging from a few rooms to the entire motel being a dugout.

The Pocket Cube

The Rubik's Cube (2x2) was invented by Larry Nichols in 1970. The 2x2 called "The Pocket Cube" is just a smaller version of the 3x3

If you can already solve the classic Rubik's cube, then lucky you- you already know how to solve a 2x2 cube!

Solving the 2x2 cube is much easier than solving the classic 3x3x3 cube.

There are competitions in solving the 2x2 cube.

The fastest time to solve a 2x2 cube is currently 0.49 seconds. Maciej Czapiewski is holding this record.

I can solve one in 10 seconds

ROBLOX and its dangers

RAIS Lukáš

Roblox isn't only a video game. It's also a platform that hosts over 40 million games. And more importantly, all the games are created by its users. Like minecraft, you can create your own virtual avatar that you will look as. It has multiplayer worlds that you can join and enjoy with your friends and where you can add them to. It has become a favourite game for a lot of children. 63% of roblox users are under the age of 16 and 25% are under the age of 9.

Of course that means there will be a lot of child predators. There have been multiple reports about children being targeted by predators. Such predators will send explicit and weird messages to the child, threaten them and there have even been cases of real kidnapping all around the world. The problem is that roblox is essentially an open world and almost everyone can contact kids and talk to them. And what is roblox doing about the situation? Well, roblox is of course trying to ban as many predators as they can, but new predators will always appear again and in larger numbers. Although Roblox tries new ways to stop them through better chat filters they always find a way to go around them after a while.

What can parents do to keep their children safe? Parents can ban strangers that they don't know. They can enable "safe privacy settings", and report any inappropriate content they see. Of course, the best way is for children to tell their parents when they see something weird or feel bad about something. As we all know, roblox isn't only a bad place for children to be in, on the contrary children can develop digital skills such as the basics of coding or develop better social skills.

Book Review

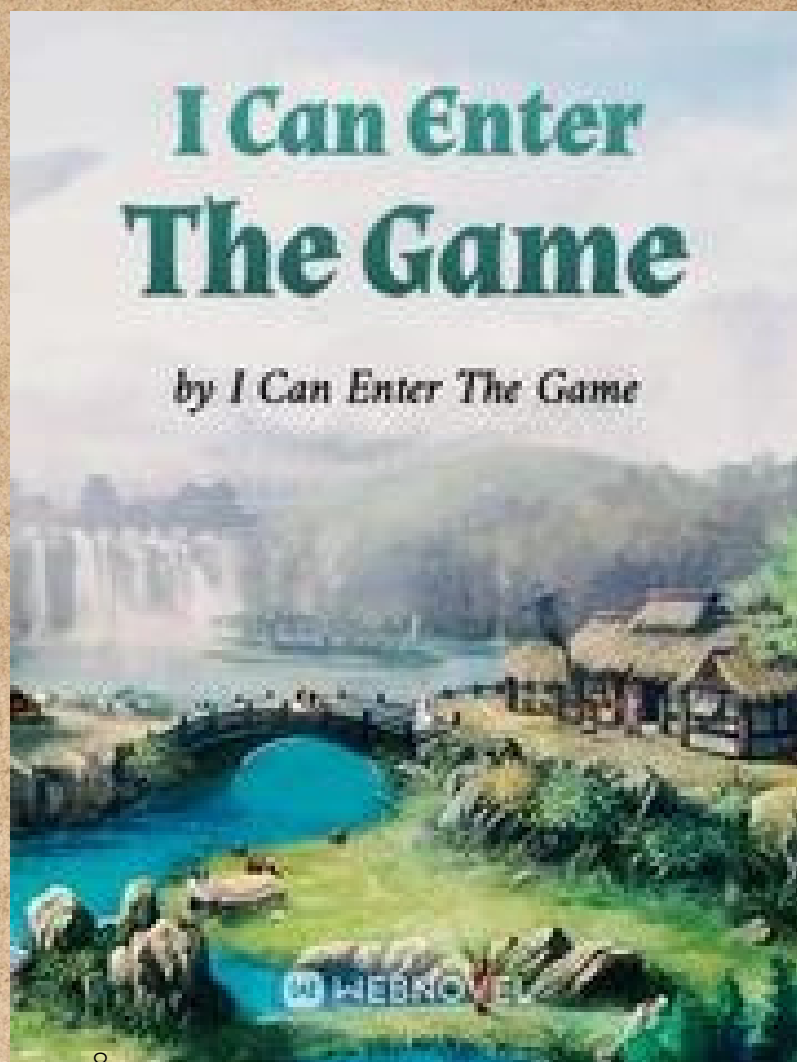

LUKÁŠ RAIS

I can enter the Game.

This book is about Qin Lin who was playing a nostalgic game called "Ranchers Story" but then he was electrocuted. He suddenly discovered he could enter the game. He could even bring the watermelon he planted in the game back to reality. At first, he planned to sell the watermelon for 3 dollars.

But then he realized he can sell 1000 watermelons for 3000 dollars. He later got new fruits and vegetables and built factories. He obtained recipes that surpassed the real world.

The book was very peaceful and easy to read. Although the start was slow it got better soon after.

LIONEL MESSI

Lukáš Reiter

Lionel Andrés Messi Cuccitini is a 35 years old star and one of the best and one of the most popular football players in the world.

Lionel was born on 24th June 1987 in Rosario Argentina. He started playing football when he was five years old. He was playing in Grandoli and his father was the coach of the team. When he was eleven he was diagnosed with not having enough growing hormones. Around that time a team called CA River Plate wanted Messi to play in their team but Lionel's parents didn't have that much money to pay for his problems with growing up. Carles Rexach (the principal then) gave Messi a contract plus paying his therapy and moving to Spain.

Messi's popularity was growing in 2009, 2012 and 2015. How did Messi get famous? Messi got famous because FIFA (Federation International Football Association) chose him five times.

Messi is still an active player and he's playing in PSG. Messi is now a very successful player and successful in his relationship with Antonela Roccuzzo since 2017. Messi's plan for the future is that he will join Barcelona again because he signed a contract with PSG for 2 years. Nobody knows if this will happen or not but we wish Messi the best and hope that he will still be one of the greatest players

Hi! My name is Jakub František Tomek. I am 17 years old. I am a former student of the basic school in Kosmonosy. It was a really great school. Enjoy this school! Now I am at the transport school in Liberec.

Teacher Hatice asked me to write some advice for you. I do not have a problem although I am not an experienced man. I am young and stupid. So, let's go. What would I say? Is studying really important? That the earth is round? Or do you need to listen to the teachers? No! You know all of this. I would like to talk about something else.

You should be interested in many activities. Do you like only football? The world is not only about football. You should also like nature. Do you only like learning? The world is not only about learning. You should go out with your friends! Do you like only cooking? The world is not only about cooking. You should go shopping?

I hope you understand what I'm talking about. Our world is full of possibilities. If you are interested in many things, you will have a chance to meet interesting people and the people could share an experience with you.

If you have a friend who is a football player he can teach you how to play football. Football players are really interesting people, but cooks? If you have a cook friend, he can teach you cooking food.

From my life: I have a friend who is a busdriver. We are good friends. He knows that I like buses and once he allowed me to sit in his place. It was great. I also tried the driver's cabin.

Yet, another story from my life: I have a friend who is a journalist. He found me a part time job – newspaper distribution (a long time ago).

What can happen: Imagine you are Mr. Novák. You do not have any hobbies. You are at a job interview and the boss is asking you: 'What are your activities?' Your answer is: 'I do not have any hobbies'. The boss says: 'Okay Mr. Svoboda is better than you.' Bye!

Imagine you are Mr. Svoboda. You are really an interesting person. You like many things. You say to the boss: 'I am interested in many hobbies. I like sports, nature and kids. I am also a football coach. I like meeting with new people.' The boss says: 'Okay, you are really an interesting person. You are better than Mr. Novák because he cares about nothing. You are good people for my company.'

You get it? If you are interested in many activities you can meet new people and those new people bring new possibilities. This is good for your life more than you think.

I believe that my advice is interesting and you think the same as me.

Never give up because life is beautiful.

I wish a nice day to all readers!

Yours sincerely, Jakub.
